***“The viable overflow alternative”***

***To ensure absolute overflow prevention and to avoid potential damage to your roof or home as a result of heavy rainfall. The Ace Gutters Spacer Range offers a viable overflow alternative.***

- The Ace Gutters Spacer is available in 10mm Clip and 5mm Clip.  
**Please Note** the 10mm Clip is compliant to the Australian Standards whereas the 5mm clip will need to be installed as an alternative solution. (Refer to installation advice overleaf).
- This simple to install SPACER clip provides a consistent gap between the gutter and fascia which allows water to escape in the event of any blockage in your guttering
- Aesthetically the gap cannot be seen from the ground or at street level
- The SPACER clip is manufactured from zinc alloy hence non corrosive
- The SPACER clip contains a snap off clip which is then installed between all spacers installed providing a consistent gap around your home.
- The Ace Gutters SPACER clip is a cost effective way to prevent water ingress into your home in the event of heavy rain.

# PREMIUM ACCESSORIES

To complement the Premium Product range Ace Gutters have introduced a range of Premium Accessories. These accessories are diecast zinc components which are conversion coated with chromate, chemically cleaned and then primed using Interpon MetaPrep™ Gold, a powder coating treatment designed as a barrier primer and surfacer for chemical and salt spray resistance. Powdered paint is applied as a top coat which is then oven baked onto the product resulting in a quality finish that ensures maximum durability in severe coastal and industrial environments.
